result was a drop in herring catches of 12,700 tous and earnings reduced by £735,000 over the same period last

#### Worrled

In spite of this apparant improvement, however, Scotlish fishermen are still very worried. They are apprehensive ahout the future, especially in view of the Government's apporant refusal to fight for at least a 50-mile limit all round the Scattish coast. The continuing increase in operating costs is also causing grave concern. These problems and the nuote systems are causing many fishermen to leave the industry, as is borne out by the decline in the size of the fleet operating.

A reflection of the state of Scottish fishing was even from the results for leat year, which have just been published. The total catch dropped by £5m tax over 1974 to In spite of this apparent
